Emergency Preparedness Working Group's Proposed Workplan for 2017

Introduction

In 2017, the Emergency Preparedness Working Group will aim to start to operationalize the APEC Disaster Risk Reduction (DRR) Framework adopted by the Leaders in 2015 to address the “new normal” by implementing the 2016 APEC Disaster Risk Reduction Action Plan. The “new normal” is characterized by at least two phenomena: the increasing frequency, magnitude and scope of natural disasters and the resultant disruption on the increasingly integrated and interlinked production and supply chain. This new normal disrupts the free flow of trade and investments across economies and present tremendous challenges and serious threats to the inclusiveness and sustainability of growth and development of the region. The overall vision of EPWG through the DRR Framework and its Action Plan is to achieve an adaptive and disaster-resilient APEC economies.

Apart from aligning the work with the EPWG 2017-2020 Strategic Plan, EPWG will fully support the 2017 Viet Nam big theme of “Creating New Dynamism, Fostering a Shared Future”, which requires as a precondition, an adaptive and disaster-resilient APEC economies. The vision of EPWG should thus be widely shared among economies for our future.

In that regard, the EPWG will align its work with the Viet Nam 2017 priorities such as:

- (i) “Deepening Regional Economic Integration” through promoting APEC Connectivity, Supply Chain Connectivity, Region Global Value Chains, and Supporting Industry, requires increasing resilience to avoid disruption of the integrated and interlinked production and supply chains, which has been a shared concern by EPWG.
- (ii) “Promoting Sustainable, Innovative and Inclusive Growth” with activities that aim to enhance capacity building for economies on increasing economic resiliency, for which addressing regional challenges of climate change mitigation, emergency preparedness, and disaster risk reduction is the key.
- (iii) Strengthening MSMEs' competitiveness and innovation in the digital age by facilitating MSMEs' greater participation in GVCs and the business environment for MSMEs can be supported and achieved by upgrading resilience and DRR efforts at various levels
- (iv) “Enhancing Food Security and Sustainable Agriculture in Response to Climate Change”, as a continuation of the work from 10th Senior Disaster Management Officials Forum” in Iquitos, Peru which took “Emergency Preparedness for Supply Chain and Emergency Food Security” as a theme of the Forum.

EPWG will also ensure cross-fora collaboration in particular with regard to the implementation of the APEC DRR Action Plan.
