- **Participation by private sectors**
 - Research community, and industries of automobile, insurance, finance and electronics
- **Core discussed issues:**
 - Exploring the strategic approach on public-private-partnership-based business continuity management (BCM)

Connecting the “business dots” to a “BCM-based supply chain”

- Items to look at
 - Information and risk sharing
 - BCM operation
 - Possible damages to CIP impacting on business operation
 - Joint operations
 - Common Operating Picture

Synergized work on regional BCP/BCM – cross sectorial collaborations

- **Managing risks and impacts of natural disasters to business in the Asia-Pacific region with Public-Private Partnership**
 - To offer feasible solution package to enhance regional resilience
 - To initiate a pilot study on BCM-based supply chain
- **Seeking leadership and coordination for cross-sectorial coordination**
 - To engage key stakeholders through Public Private Partnership
 - To keep flexibility among Private Sector, NGOs, NPOs and government to take leading role
 - To manage risk of critical infrastructures

Accumulation of knowledge, experience and know-how of BCP and BCM

- **Information-intelligence knowledge Platform**
 - To build up Integrated systems and database adopt Open Data Approach
 - To design scenario-based joint drill in the APEC region
 - To involve the disaster risk management with financing sectors
 - To keep BCM rating transparent
 - To discuss disaster sign standard for risk communication
- **knowledge transfer and the best Practices sharing of BCM**
 - To share information
 - To share experiences of formulating BCPs
 - To provide solution package on challenges while implementing BCPs

Thank for your kind cooperation
